

National Dope Testing Laboratory

WADA Accredited Lab ISO/IEC 17025:2005 - NABL Accredited Lab

172/Admin/NOTK/2015-12

Dated 9.10.2015

Corrigendum

This is to inform that in reference to the Tender "Bid Reference No. 172/Admin/NDTL/2015-16" for procurement of one LC-QTOF system for NDTL, few amendments are made in the "Section – XIII - Technical Specifications" and in Section-VII-Qualification criteria. All interested bidders are requested to see the revised said sections uploaded herewith before filing their bids.

Pr. Scientific Director NDTI

National Dope Testing Laboratory, Ministry of Youth Affairs & Sports, Govt. of India, Jawaharlal Nehru Stadium Complex, East Gate, Near MTNL Building, Lodhi Road, New Delhi 110003, India. Section – XIII Technical Specifications of

ULTRA PERFORMANCE LIQUID CHROMATOGRAPHY, HIGH RESOLUTION QUADRUPOLE TIME OF FLIGHT MASS SPECTROMETER- (LC-QTOF) SYSTEM.

S.No	Brief	Specification				
-	Description of					
	nems					
	Quadrupole Time Of Flight Mass Spectrometer - (Q-ToF) System:					
1	Ion Source	The instrument must be equipped with a Combined or separate lonization Source assembly for ionizing samples in both ESI & APCI sources.				
		Facility for switching between the two ionization types (ESI & APCI) during a single LCMS experiment should be available.				
		Positive and negative ionization capabilities must be included as standard on the instrument.				
		An isolation valve must be fitted to the source to allow the source elements to be removed and cleaned without breaking instrument vacuum, maximizing instrument uptime.				
		ESI Flow Rate Range: Up to 2ml/min or more without the use of splitter.				
2	Mass Analyzer	The instrument should be capable of operating in following modes:				
		Quadrupole Mass Range / Quadrupole Isolation Range: 1200m/z or better				
		TOF Mass Range: The mass range of the analyser must be 10,000 m/z or better.				
3	Vacuum System	Suitable Vacuum system to operate the instrument.				
4	Acquisition Rate	Minimum 25 Spectra per second or better maintaining a resolution of \ge 35,000 FWHM in MS mode.				
		(Separate scan speed should be defined for MS mode & MS/MS mode)				
5	Resolution in MS mode	1) For mass range above 1000 m/z must be \ge 40,000 FWHM ii) For mass range upto 1000 m/z must be \ge 25,000 FWHM				
		Note: a) Particular Masses used in both the case should be mentioned				

		b) Resolution in MS/MS mode and the mass used should		
		also be mentioned.		
6	Mass	Minimum 1 ppm, in MS mode and 2 ppm in MS/MS mode on 10		
	Accuracy	consecutive repeat measurements using suitable lock mass.		
7	Sensitivity	1. S/N ratio in MS Mode and MS/MS mode" of 1 pg on-column		
		reserpine injection should be more than 300:1 with above claimed		
		resolution.		
		2. The dynamic range of at least 5 orders.		
0	Diment			
8	Direct	Syringe pump or equivalent for direct infusion of samples.		
	Infusion			
0	Poforonoo	The instrument should be espekie of internal reference mass		
9	Reference	The instrument should be capable of internal reference mass		
	Mass	correction for MS and MS/MS operation without losing sensitivity		
	Introduction.			
10	Interface	a) The design of the instrument should be to maximize the intake		
10	Interface	a) The design of the instrument should be to maximize the intake		
		or forther that are generated during to forthzation stage in to the mass analyzer, by following it up with a design to reject the		
		excessive neutrals that are taken into the system along with		
		the ions like Ion Funnel Guide / Sten Wave or any other		
		technology		
		b) A third dimension of ion separation particularly for isobaric		
		species, co-eluting ions using advance tech based Ion Mobility		
		or similar technology generating results equivalent to ion		
		mobility should be part of module. The control of ion mobility or		
		similar technology should be through software		
11	Acquisition	Following acquisition modes must be available:		
	Modes			
		1. MS Scanning		
		2. MS/MS product Ion Scanning		
		3. Simultaneous MS & MS/MS scanning. The software should be		
		capable of data acquisitions whereby high and low collision		
		energy data is acquired simultaneously to provide		
		tragmentation data for all detectable molecular ions.		
		4. Additional mode of operation of the equipment to maximize		
		specificity with MRM quantitation using high resolution		
		ragment ions, to do Quai/Quan applications at sub ppb level in		
12	Computer	a single run. A suitable computer with boowy duty printer UP 2000 series or better		
12	Computer	A suitable computer with heavy duty printer TIP 5000 series of better		
		to operate the system.		
13	Operating	The software should be user friendly & have capabilities to perform		
	Software	the following functions.		
		Integrated sample/calibrant delivery system + programmable divert		
		valve		

		Automated	d mass calibration		
		Software tools for addressing Screening, Component Identification Structural Elucidation workflows.			
		The data processing software must incorporate an elem composition calculator as standard. Included into the calculator be algorithms for isotope pattern modeling that allow interpretation of actual isotope patterns. A goodness of fit from a to theoretical isotopes must be included. The ability to filte incorrect elemental composition calculations through the us intelligent spectral interpretation algorithms must be incorporated Suitable software for detection and identification of metab (expected and unexpected), minimizing false positives and gener extensive metabolite lists using various mass defect filters shoul quoted.			
		The softw taking frag fragments	are should also have capability for assigning structures by gment ion spectra into account and automatically calculating based on algorithms.		
14	Gas Generator	A suitable compresse (99.99%), must be q	e and efficient/ high quality gas generator with built-in or capable of providing all the gases at the required purity pressure and flow rate for the QTOF Mass Spectrometer uoted. The compressor should be noise-free.		
15		LIQUID	CHROMATOGRAPHY UPLC SYSTEM:		
15	A liquid chromate and sample man	LIQUID Dgraphy sys agement w	CHROMATOGRAPHY UPLC SYSTEM: stem should provide an integrated configuration for solvent ith the following specifications		
15	A liquid chromate and sample man Pump:	LIQUID ography sys agement w	CHROMATOGRAPHY UPLC SYSTEM: stem should provide an integrated configuration for solvent ith the following specifications Quaternary Gradient Pump /Solvent Manager with low pressure mixing.		
15	A liquid chromate and sample man Pump:	LIQUID ography sys agement w	CHROMATOGRAPHY UPLC SYSTEM: stem should provide an integrated configuration for solvent ith the following specifications Quaternary Gradient Pump /Solvent Manager with low pressure mixing. Operating Flow Rate Range to be 0.010 to 2.000 mL/min, in 0.001 mL increments.		
15	A liquid chromate and sample man Pump:	LIQUID ography sys agement w	 CHROMATOGRAPHY UPLC SYSTEM: Stem should provide an integrated configuration for solvent ith the following specifications Quaternary Gradient Pump /Solvent Manager with low pressure mixing. Operating Flow Rate Range to be 0.010 to 2.000 mL/min, in 0.001 mL increments. Operating Pressure should be 15000 psi or better. 		
15	A liquid chromate and sample man Pump:	LIQUID ography sys agement w	CHROMATOGRAPHY UPLC SYSTEM:stem should provide an integrated configuration for solventith the following specificationsQuaternary Gradient Pump /Solvent Manager with lowpressure mixing.Operating Flow Rate Range to be 0.010 to 2.000 mL/min,in 0.001 mL increments.Operating Pressure should be 15000 psi or better.System Delay Volume < 400ul, independent of systembackpressure (with standard mixer)		
15	A liquid chromate and sample man Pump:	LIQUID ography sys agement w	 CHROMATOGRAPHY UPLC SYSTEM: Stem should provide an integrated configuration for solvent ith the following specifications Quaternary Gradient Pump /Solvent Manager with low pressure mixing. Operating Flow Rate Range to be 0.010 to 2.000 mL/min, in 0.001 mL increments. Operating Pressure should be 15000 psi or better. System Delay Volume < 400ul, independent of system backpressure (with standard mixer) The chromatography system should be capable of being operated both as a HPLC & UPLC by interchanging the column chemistries. 		
15	A liquid chromate and sample man Pump: Auto sampler:	LIQUID ography sys agement w	CHROMATOGRAPHY UPLC SYSTEM:stem should provide an integrated configuration for solventith the following specificationsQuaternary Gradient Pump /Solvent Manager with low pressure mixing.Operating Flow Rate Range to be 0.010 to 2.000 mL/min, in 0.001 mL increments.Operating Pressure should be 15000 psi or better.System Delay Volume < 400ul, independent of system backpressure (with standard mixer)The chromatography system should be capable of being operated both as a HPLC & UPLC by interchanging the column chemistries.An auto sampler should be quoted with a Sample Carryover < 0.005% or < 2.0 nL, whichever is greater (with dual wash).		

		Storage Devices.	
	Photo Diode Array	Wavelength Range	: 190 – 800nm.
	Detector:	Wavelength Accuracy	: ±1nm or better
		Optical Resolution	: 1.2 nm or better
		Flow Cell Path Length	: 10 mm
		Flow Cell Volume	: 10ul/10 mm or
		(Please specify	2.5ul/5mm or better.
		volume.)	the Exact flow cell
16	Single Point of Control	Single point control for bo	th LC and MS system
17	Training	Training for application ar	nd maintenance :
		1. Training of 2 persons a	t factory site
		AND	
		2.Training of 2 persons at	domestic application/CoE site.
18	UPS System	15 kva ups with one hour	power back-up
19	Others	Any other auxiliary items such as gas regulator, gas purifier etc. etc.	
20	Warranty	1 Year standard warranty	from the date of installation.

SECTION – VII

QUALIFICATION CRITERIA & PERFORMANCE STATEMENT

(A) QUALIFICATION CRITERIA

Bid Reference No. 172/Admin/NDTL/2015-16

Dated:

- (a) The Bidder must be a Manufacturer or its exclusive Authorized Agent.
- (b) The bidder must satisfy the following qualification criteria -

SI. No.	Qualification Criteria				
1	Annual turnover of manufacturer/bidder (Average of last 3 years of 2013-14, 2012- 13 and 2011-12) (Enclose documentary evidence such as certificate given by the Chartered Accountant)	Rs. 25.0 Crores.			
2	Proven past performance of bidder of supplying satisfactory to sports stadia/ sports academies/ sports federations/ sports training centres in last 3 years.	a) The quoted model or preceding model of the equipment/system should be atleast one installation in WADA accredited anti-doping laboratory and two installations in similar laboratories which are engaged in the field of drug testing/forensic/toxicology related research.			
		(b) Number of installation in India in Govt./ Private Sector and WADA approved labs globally should be mentioned and list containing contract details of the user and institutions should be provided.			
3	After Sales Service: After sales service network in India of manufacturer/ Indian Agent to satisfactorily cater to services. The Bidder has to provide a good after sales service support. The shutdown problem in the machine should be rectified within 24 hrs. and 72 hrs., if any part is required to be replaced. A undertaking in this regard should be given along with the quote. The Bidder will give complete addresses of after sales service centres in India alongwith technical manpower available.				
4	The manufacturer should be manufacturing the same type of equipment at least for the last five years. The quoted model of the system should be in use atleast for last one year and the model launched after 1 st January 2015 will not be accepted.				
5	Indian Agent of manufacturer and in business of supplying Installing & maintaining (during warranty period and CAMC period) equipment prior to the date of opening of Bids for atleast one year.				

(c) In support of the above, the bidder shall furnish relevant documents, Performance Statement as per Pro-forma in Section-III (B).
